[SBP] superman4money3

—

Yesterday at 12:30 PM

Does staff include sbp?

[FMB] Rockethead293

—

Yesterday at 12:35 PM

in game radio? why?

[SBP] superman4money3

—

Yesterday at 12:40 PM

In game radio for amb, zello for fmb and air to ground im guessing

[FMB] Rockethead293

—

Yesterday at 12:40 PM

ok that's good

[BD] Light_Mode227

—

Yesterday at 1:06 PM

In game because resource requests are currently done by text there

Also most pilots have previously been taught to communicate with ground crews on in game radio before zello was a thing

[FMB] Rockethead293

—

Yesterday at 1:07 PM

Will ground crews be using 122.85 on Zello to contact ATGS?

[BD] Light_Mode227

—

Yesterday at 1:07 PM

Staff includes all staff

[BD] Light_Mode227

—

Yesterday at 1:07 PM

Yesno

We'll go over everything with staff prior to it starting

That's why I want staff early

[FMB] Rockethead293

—

Yesterday at 1:08 PM

I feel like it's more effective to just explain this stuff

I know some people don't know if they're gonna join or not because we do not want to use the ingame radio for comms because all due respect, it suuucks

[SBP] James878912

—

Yesterday at 1:09 PM

Heheha

https://tenor.com/view/clash-royale-heheheha-grrr-emote-king-gif-24764224

[BOS] jaygold3_33

—

Yesterday at 2:55 PM

Can we play with the beach ball afterwards

[DS-HC] Rupert_Barrq

—

Yesterday at 3:06 PM

3am is criminal

[FMB] diamondguest123

—

Yesterday at 3:37 PM

Damn. Can't make it.

[FMB-HC] w0rth0g

—

Yesterday at 4:06 PM

4am.

[BD] Light_Mode227

—

Yesterday at 4:20 PM

lcl zello sucks

Also yk the radio has text part right

I'm not just talking bout vc

[BD] Light_Mode227

—

Yesterday at 4:21 PM

And it's more effective to explain it in vc

Cut it out

[FMB] Rockethead293

—

Yesterday at 4:24 PM

Not rlly it has problems but it's so much better than roblox vc

[FMB] Rockethead293

—

Yesterday at 4:30 PM

Oh also yes I know this is the main thing too this also sucks

I myself will not be attending because of this, the ingame radio is bad, there's a reason we have fourty-something VCs across all the servers

[BD] Light_Mode227

—

Yesterday at 4:57 PM

cool then never fly in deployments

wait hang on

seein u in AMB is messing with my brain

[FMB] Rockethead293

—

Yesterday at 4:58 PM

Dude I literally was deployment cert'd and flew in like 3

[BD] Light_Mode227

—

Yesterday at 4:58 PM

never get air support in deployments*

[FMB] Rockethead293

—

Yesterday at 4:58 PM

I have experience with it

[BD] Light_Mode227

—

Yesterday at 4:58 PM

right so u understand that there are protocols in place for a reason

if u can't follow them then u can't fly

[FMB] Rockethead293

—

Yesterday at 4:59 PM

My guy, I'm not saying "never use the text radio ever" I'm saying "there are better options than the shitass roblox radio that will tag without a second thought and warn you for saying that you're holding in F9"

And if those protocols are causing a lot of people not to attend events, then well... those protocols should change

Either way, I think this is a problem best brought up with the FMO privately instead of in a public thread with an FF2, so I'll stop chatting here

[BD] Light_Mode227

—

Yesterday at 5:13 PM

As I've said, the purpose of this event is to figure these things out. If you do not wish to attend then you will not get a say and will not be able to carry out the correct procedures in deployments. End of

[FMB] Rockethead293

—

Yesterday at 5:15 PM

That feels excessively rude but okay

[BD] Light_Mode227

—

Yesterday at 5:18 PM

I'm sorry that it came across that way to you but those are just the rules

[DS-HC] Rupert_Barrq

—

Yesterday at 6:09 PM

Guys can we move this to DMs

[SBP-EC] urheh

—

Yesterday at 6:09 PM

dude just use slightly more brain power and remember to click the proper channel

[BOS-EC] TheSwisstorian

—

Yesterday at 6:10 PM

True it isn't hard

[BOS] Doom7583

—

Yesterday at 8:43 PM

Zello ain't bad

Pilots just need to set a key bind and know how to use it

And this event at 4am I ain't showing up

[BOS] jaygold3_33

—

Yesterday at 9:40 PM

Yeah we need a group training and showing bliots how to do stuff ASAP

[BD] Light_Mode227

—

Today at 2:38 AM

where tf is anyone's respect here

have u guys forgotten how to behave properly in FMB?

[BD] Light_Mode227

—

Today at 2:38 AM

this kind of disrespect to staff would not fly in AMB (no pun intended)

I genuinely thought you guys were better than that and if it continues then I see no reason to host more joint events

The arrogance is insane

[DS-HC] Rupert_Barrq

—

Today at 4:02 AM

We have respect.... We just don't like seeing an entire department failing due to command staff..

Also could we maybe... Put this event foward a few hours?

Like I am not waking up at 3am for this..

[SBP] James878912

—

Today at 4:05 AM

Assuming you, as a BRANCH DIRECTOR, seeing all of this "disrespect" and not knowing why is crazy. I would personally call it collective dislike twords your Branch. Clearly we have a reason to be "disrespectful" to AMB because here at FMB, we like to give exactly what we get.

The call is coming from inside the house

Step up your own branch. Focus less on US. woohoo for the joint training however, that is a step in the right direction

[DS-HC] Rupert_Barrq

—

Today at 4:06 AM

A very small step in the right direction

[SBP] James878912

—

Today at 4:06 AM

hope to see yall more active and capable

than what we've been seeing in FMB for Months

[DS-HC] Rupert_Barrq

—

Today at 4:07 AM

I fully agree with what James is saying and support it, we've not been seeing much happening in regards with AMB....

[SBP] James878912

—

Today at 4:07 AM

I'd be honored to get called out from HR, but we will save that for another day. Goodluck on that Branch wide retraining yall need. Oh wait... It's not gonna happen

👋

[DS-HC] Rupert_Barrq

—

Today at 4:08 AM

😆

To be fair, calling us arrogant is insane considering the ignorance of not seeing AMB failing… But like what James is, chao

[SBP] James878912

—

Today at 4:11 AM

we can refer to the HQ server incident reports... oh wait... yall also havent been logging aviation mistakes, have you? Cover up? or just a "game issue"... its always "Game error" and never "pilot error", But when it is actually pilot error, you just strike them and move on???. Tell it to the entire squad of T1 IHC who were killed due to the negligence of AMB 😄

but again... Not wanting to get in trouble for calling people out on what still needs to be called upon... I'll drop it here. Goodluck incompetent important AMB members!

(also we never asked for joint events, They always end up screwing FMB over in some way, hence why I myself stopped hosting them, and noone else in FMB does : D)

Hope this all helps, Bless your hearts 💔

[BD] Light_Mode227

—

Today at 4:30 AM

If you have things to say not relevant to this event please do not use this thread. This is not for bickering it is for discussing anything related to the event. Thank you

[BOS-EC] TheSwisstorian

—

Today at 7:54 AM

I believe this event will be more of a hazard than any good, hopefully when you guys get on the same page as the actual RP branch we all can enjoy doing joint events again.

Perhaps you could use this event to get more OV-10 pilots and ATGS/ASM/LEAD guys.

(Also throwing shade and then backing out is wild)

[BOS-HC] JobeLavelle

—

Today at 10:01 AM

I am requesting all FMB personel stop talking before punishment is handed out. While there are issues, yes. There is no need to attack Light mode in a public channel. This is unacceptable. Simply come or don't come. No need to air out your complaints now. We have a system for this. I expected better from FMB members including my own CS. Light mode please disregard this and allow us to work this out.

[BOS-EC] TheSwisstorian

—

Today at 10:12 AM

Image

[SBP-EC] urheh

—

Today at 10:33 AM

what is insane is you blaming literally everyone else for your short comings, you cannot take criticism or advise because light_mode must always be right and the only one right because light_mode is the best. but we don't wanna talk about that

[BD] Light_Mode227

—

Today at 10:36 AM

ty

[BD] Light_Mode227

—

Today at 10:37 AM

The event description tells you what this event is about. It is a training to establish how to communicate between AMB and FMB. We haven't had these events before and it shows because deployments are a shitshow. The whole point of this is to increase fluidity and interoperability between branches

[FMB-EC] WarriorGhostKing

—

Today at 10:38 AM

IDK man all the fmb events we have been doing have great interaction with radio use and zello.

The new guys like me have no problem with zello

just as a new ic there is no zello to contact aviation.

[SBP-EC] urheh

—

Today at 10:39 AM

real warrior

i think a lot of the comms issues with amb can be fixed by zello

[BD] Light_Mode227

—

Today at 10:44 AM

That's exactly why this is a joint event. We don't do joint coms events. That's why in deployments coms between branches are bad

both AMB and FMB have great coms between themselves

but between each other it is a mess

the whole point of this is to allow use to integrate

[FMB-EC] WarriorGhostKing

—

Today at 10:45 AM

Here me out should not every event be a comms event. Comms is the number one thing that allows humans to exist.

[BD] Light_Mode227

—

Today at 10:45 AM

zello is not good for AMB. It has been tested multiple times

[BOS-EC] TheSwisstorian

—

Today at 10:45 AM

idk seems to work fine for those I've worked with

[SBP-EC] urheh

—

Today at 10:45 AM

dude i hear AMB constantly complaining about how bad their coms are amongst themselves

[BOS-EC] TheSwisstorian

—

Today at 10:45 AM

Hopefully this could be more for YOU guys to get some training in with Zello

[SBP-EC] urheh

—

Today at 10:45 AM

crazy works great for doom and syphon

[BD] Light_Mode227

—

Today at 10:46 AM

You're right. Every event is a coms event. The difference is that this is not a deployment so allows us to work on coms in a low pressure environment. It allows protocols to be established for smoother flows in deployments. You don't send brand new trainees on to deployments, you train them first. This is that training

[BD] Light_Mode227

—

Today at 10:46 AM

We will not be primarily using zello. Please read what I have already said

[BOS-EC] TheSwisstorian

—

Today at 10:46 AM

I know that's why I said you COULD do that

Please read what I have already said

[SBP-EC] urheh

—

Today at 10:47 AM

he cannot cause that would mean admitting someone else had an idea for amb

[BOS-EC] TheSwisstorian

—

Today at 10:47 AM

Rules for thee, not for me

[DS-EC] gangrel1230

—

Today at 10:51 AM

So is ATGS using zello to communicate with IC or is IC-ATGS comms also thru Roblox VC/text?

[BD] Light_Mode227

—

Today at 10:51 AM

One more rude comment and I will cancel the event and have a serious conversation with your staff about consequences. I know many of you already have some pre-conceived opinions of me without meeting me but this level of disrespect is not on. As you know, all of the staff here volunteer their time and some have put a large amount of work into this server. If you cannot behave appropriately and respect other staff then there is no reason you should be able to be staff yourself. If you don't want to attend the event don't attend. Cussing out someone and their event for the sake of it is not on. Do better

[BD] Light_Mode227

—

Today at 10:52 AM

currently that might have to be the case

we will discuss it with staff prior to the event

resource requests tend to be by text but if that is a problem for FMB we can try zello

[SBP-EC] urheh

—

Today at 10:56 AM

i'm gonna be real i don't think anyone has said a swear word in here

[BD] Light_Mode227

—

Today at 10:57 AM

Sorry, that was bad phrasing

just general insulting*

[SBP-EC] urheh

—

Today at 10:58 AM

i think air ops would be 100% smoother if you guys figured out bare minimum how atgs can use zello to communicate with IC

[BOS-EC] TheSwisstorian

—

Today at 10:58 AM

Hey Light, I have a great suggestion. Cancel the event until FMB sends you a document helping you out buddy. It'll make it better for everyone involved, we both have something standardized and no one gets confused!

Speaking about disrespect maybe you should go through your own messages with people in AMB, I'm sure you might be very familiar with disrespecting people. I have respect for the people below you but not you. You never showed FMB any respect during your time in EC, please don't talk about commitment to the group.

[DS-EC] gangrel1230

—

Today at 10:59 AM

I'll be honest. It feels less joint and more like this is the way we do things conform. And obviously both sides are that way. So hopefully in the future it can be sorted out. Idk if during the event is the time to work out how to communicate without sitting down staff to staff beforehand (and well beforehand) to coordinate between groups.

[BD] Light_Mode227

—

Today at 11:00 AM

this Event was discussed with ryan, tyler and mushroom

[SBP-EC] urheh

—

Today at 11:00 AM

ideally the whole division should use zello but baby steps, the issue you guys have is you're tabbing out to mic up when you can hotkey they command

[BOS-EC] TheSwisstorian

—

Today at 11:01 AM
